IC13: APPROVED MEDICATIONS

Policy

Only medications and nutritional supplements approved by the FDA for human use are used in the facility.

Procedures

- A. Prescription medications used in the facility are valid if dispensed from any licensed pharmacy in the United States, or as part of an approved source as part of a valid investigational drug program or study, and prescribed by a licensed prescriber
- B. Non-prescription drugs and nutritional supplements used in the facility are provided by MAC Rx if the product is available from a contracted wholesaler and prescribed by a licensed prescriber.**
- C. Drugs not approved by the FDA for distribution in the United States are not permitted. This includes marijuana for medical use.
- D. Per DEA regulation, medical marijuana is not approved for use in this facility. Potential residents and their family members/responsible parties should be informed about this restriction prior to admission so that alternative therapies may be considered.
