

## How to add Covid-19 results to Preventive Health in Matrix.

---

1. Click on the “resident tab/preventive healthcare”
2. Click on the “add” blue button
3. Choose “Covid-19 Test” as Test Type

The image shows a dialog box titled "Preventive Health Type Selection". It contains a grid of blue buttons for selecting a test type. The buttons are arranged in three rows: the first row has "COVID-19 Test", "Hemocult Test", "Hepatitis Vaccine", and "Influenza Vaccine"; the second row has "Pneumococcal Vaccine", "TB Test", "Tetanus Vaccine", "Varicella (Chickenpox) Vaccine", and "X-Ray"; the third row has "Zoster Vaccine". A "Close" button is located in the bottom right corner of the dialog box.

4. Enter the date the test was performed
5. Select the Type of Test “Viral”
6. Select the result
7. Type the Lot Number in comments: Example - Lot #123456
8. When all done click Save.

If you need to edit or mark invalid a record, find the record listed on the left hand side of the screen, select it Go down to the bottom and click on the edit or mark invalid button button. Make any changes you need and save.

**Remember when testing a resident, an order must be entered into Matrix.**
